

FEWD - JS FUNCTIONS

JOHN CRAIN

Interactive Developer - MRY

AGENDA

- Functions
- Arguments
- Return Values
- Code Along
- Lab Time

FUNCTIONS

```
document.getElementById('myId').onclick = someFunction;
```

```
function someFunction(){  
    // do some stuff  
}
```

ARGUMENTS

- Similar to math
- $f(x) = x + 5$

```
var myNumber = "10";

document.getElementById('myId').onclick = stringToNumber
;

function stringToNumber(){
    myNumber = parseFloat(myNumber);
}
```

RETURN VALUES

```
var myNumber = 0;

document.getElementById('myId').onclick = someFunction;

function someFunction(){
    myNumber = addFive(myNumber);
}

function addFive(num){
    num += 5;
    return num;
}
```

This will call addFive,
will pass in the
whatever myNumber
was, and then return a
number

myNumber will then
